

EKRAM AHMED

Rising 3rd-year **SOFTWARE & MACHINE LEARNING ENGINEER** student at Addis Ababa University with a **3.82 CGPA** and **AI/ML Intern** at iCog Labs . **Passionate about backend architecture, cryptographic security systems, and decentralized financial technologies. Seeking to leverage strong foundations in Python, logic design, and database systems to contribute to open-source infrastructure networks**

Professional Experience

Address

5 kilo ADDIS ABABA,ETHIOPIA

Education

• **CGPA: 3.82 / 4.00 (Dean's List)**

• **Core Courses:** Linear Algebra, Statistics, Data Structures.

CS50x: Intro to Computer Science | HarvardX (2024)

• **Focused on algorithmic logic and memory management.**

Skills

- **PyTorch & Deep Learning**
- **Machine Learning Math (First Principles)**
- **Python & Statistical Analysis**
- **Database Systems (SQL & PostgreSQL)**
-

Language

- English
- AMHARIC

AI/ML Engineering Intern | iCog Labs (2026 – Present)

- Developed an end-to-end **information-theoretic evaluation** pipeline in **PyTorch** to audit classification uncertainty on the **MNIST dataset** from scratch.
- Implemented native mathematical operations for Shannon Entropy (Nats) and custom categorical cross-entropy loss with analytical Log-Sum-Exp boundary guards.
- Converted complex evaluation trace data into statistical profiles to isolate overconfidence anomalies in deep learning systems.
- driving technical presentations that successfully elevated my ranking.

2025

Technical Sales & Business Development

afrobo.io

Designed and managed SQL database schemas for a student project, ensuring efficient data retrieval and logic flow.

- **Managed client relationships** and translated complex technical requirements into actionable project goals.
- **Translated complex technical concepts** into clear business benefits to drive enrollment and partnerships.
- Consistently met sales targets by identifying client needs and building **long-term professional relationship**.

Founder & Lead Tutor (Summer

Program)

Founder & Project Lead

- **Conceptualized and managed** an end-to-end educational project for 100+ students, overseeing curriculum design, marketing, and operational logistics
- **Developed specialized tutorials** for the Ethiopian Airlines Written Exam, focusing on technical aptitude..
- **Managed all marketing and administrative operations**, demonstrating strong entrepreneurial initiation.

Technical Projects: Developed **INSA Cyber Vault**, a secure Python-based encryption system for the INSA Cyber Talent Challenge 2026. Contributed to **AgriConnect**, a Java platform digitizing agricultural markets in Ethiopia. Additionally, built **websiteforxafrobos**, a responsive professional portfolio using JavaScript, demonstrating a strong understanding of both backend logic and frontend integration.
